PROJECTS

Simon — *HTML/CSS/JS*

A client-side browser game emulating the classic HASBRO memory game. Built using HTML, CSS, and vanilla Javascript and deployed to Github Pages – codymurr.github.io/Simon/

github.com/CodyMurr/Simon

Cors — *Python3/Django/PostgreSQL*

A full-stack, ecommerce web application built in collaboration with three fellow SEI students while attending General Assembly. Minimalistic and elegant, the app's intent is to provide a simplified online shopping experience for consumers of high-end skin care products. Technologies used are the Django framework, Python3, and PostgreSQL. Deployed via Heroku - cors-sei.herokuapp.com/

github.com/CodyMurr/cors-project

EXPERIENCE

Rock Solid Concrete Inc, Cookeville, TN — *Concrete Finisher*

July 2021 - January 2022

Aided in excavation, preparation and completion of a multitude of commercial and residential concrete projects. Demonstrated ability to adapt to changing work environments and collaborate with crew members to see projects to completion with minimal discrepancies.

Smith Construction Group, Dayton, OH — *Concrete Foreman*

November 2014 - February 2021

Oversaw the layout, excavation, and placement of 20+ commercial fueling station foundations while maintaining a clear line of communication with project managers, superintendents, and sub-contractors.

U.S. Navy, FPO/AP — *Aviation Ordnanceman*

September 2011 - 2014

Performed maintenance on ship's manned weapon systems and ammo magazines and logged all
